

Leadership Thurston County Youth Program

In partnership with New Market Skills Center (NMSC), Leadership Thurston County (LTC) will provide a 3-week summer session called Business & Community Leadership as a program option of summer school.

Business & Community Leadership: This course empowers students with socially responsible business and leadership skills through immersive community experiences. Each day focuses on a key theme—ranging from equity and environmental sustainability to law, education, and economic development—allowing students to engage directly with local businesses, nonprofits, and civic leaders. Community immersion days provide real-world exposure to the intersections of business and social impact, culminating in a collaborative service project. The course concludes with a reflection on how students can apply their new skills to create positive change in their communities.

There is no cost to the students for any part of our Youth LTC program.

Expected number of students: 24 students
